

FIRAT ORHAN

Front-End Developer

PROFILE

I'm currently working at FairTeknoloji, a company that specializes in building Fintech products.

At Fair Teknoloji, my responsibility is to provide end-to-end frontend support for Adil Katılım Bankası projects. This involves perfecting the user experience and developing effective solutions tailored to meet customer needs for both mobile and web applications.

TECHNICAL SKILLS

Vue.js, React, Next.js, Nuxt, Angular, TypeScript, Redux, Pinia, Bootstrap, SASS, TailwindCSS

WORK EXPERIENCE

Front-End Developer Specialist at FairTeknoloji

September 2024 - Now

I contribute to the development process of the Adil Katılım Bankası project, where we aim to provide efficient and user-friendly solutions for mobile and web platforms, using **Vue**, **Nuxt** and **TypeScript**. We also use **Pinia** for state management and **Vuetify** to create modern, responsive and accessible user interfaces.

Front-End Developer Specialist at Innova

April 2024 - September 2024

In the SkywaveloT project, which enables the centralized tracking of devices through a single platform control mechanism, I worked with **Angular**'s dynamic components and dynamic widgets using **TypeScript**. Additionally, I performed UI and UX developments using **Material UI**, **Bootstrap**, and **SCSS**.

In the YanYana: AI-Powered Interactive Learning Platform for Children with Autism project, which provides an interactive learning experience for children with autism, I worked extensively with **React** and **TypeScript**, managing modules, implementing state management using **Redux Toolkit** and **Redux Thunk**, and developing reusable components.

Front-End Developer Assistant Specialist at Innova

May 2022 - April 2024

CloudWorks is a project that consolidates cloud services onto a single platform and can integrate other cloud systems and marketplaces. In CloudWorks, I developed the dealer workflow and action-based authorization controls end-to-end using technologies such as **Angular**, **NgRx** (state management), **TypeScript**, **FormBuilder** (for DynamicForm), **Bootstrap**, and **SCSS**.

As part of the Turkish Telekom Wi-Fi project, I contributed to the development of the Wi-Fi interface at Istanbul Airport (IGA). This project provides wireless internet access at thousands of service points, catering to locations outside of homes and workplaces. I contributed to the interface development using modern technologies such as **Vue**, **Bootstrap**, and **SCSS**.

Front-End Developer Intern

February 2022 - July 2022

My 1-month compulsory internship in Innova, I continued voluntarily for 3 more months and mainly took part in angular projects. I was involved in developing the static website of the Turkey Securities Securitization Company (TSC) using the **Angular** framework, **TypeScript**, **Bootstrap**, and **SCSS** technologies. Subsequently, during my time at Innova, I conducted maintenance work on this project.

Side Projects

Human Interface Hub / www.huinhub.com

I developed an advanced UI component library where each component is published as a separate **NPM package**, working with **React**, **TypeScript**, and **Next.js** to create modular and reusable components.

EDUCATION

Bahçeşehir University
